Art Unit: 3712

The Terminal Disclaimer of 8/12/02 has not been accepted, because it references the wrong Application number, 09/771882, rather than 09/771822.

Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,179,736 in view of France 2,689,228.

Patent '736 claims a graphite arrow including a front parallel portion, and rear tapered portion. However, the tapered portion may make it difficult to attach fletchings. One would recognize that it may be easier to attach fletchings to a parallel portion of the arrow shaft. For example, France '228 shows that an arrow may include a parallel portion 10, tapered portion 12, and rear parallel portion 14 including fletchings. It would have been obvious to one of ordinary skill in the art to include this rear parallel portion on the arrow of patent '736.

Claims 1-10 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-23 of copending Application No. 09-886513. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

Art Unit: 3712

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: a fiber reinforced arrow shaft, having longitudinal fibers, biased fibers, a forward parallel portion, a tapered portion, and a rearward parallel portion.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3712

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

The claims are not rejected over the prior art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
